

# Adopt - Power Platform - Tenant and Portfolio Management

## Adoption Service

**Duration:** 1 - 5 Day [ Remote / Onsite ]

**Difficulty Level:** 300 - Advanced

### Description

Unlock the full potential of your business with our Adoption VBD based on the Power Platform. Streamline tenant and portfolio management, leverage low-code solutions for rapid development, and ensure robust governance and strategy alignment. Benefit from continuous support and education, while enjoying seamless integration with the Microsoft ecosystem. Transform your operations with a platform designed for agility, efficiency, and growth.

### Objectives

- Enhance Governance and Compliance - Establish a governance framework to manage Power Platform resources effectively. Ensure all Power Platform deployments comply with organizational policies and industry regulations.
- Improve Operational Efficiency - Automate routine administrative tasks to reduce manual effort and increase efficiency. Provide admins with tools and dashboards for real-time monitoring and management of Power Platform environments.
- Foster Innovation and Collaboration - Encourage the use of Power Platform to innovate business processes and solutions. Promote collaboration between IT and business teams to leverage Power Platform capabilities fully.

### Outcomes

- Streamlined Administration - A unified admin experience with a centralized dashboard for managing all Power Platform resources, leading to increased administrative efficiency and reduced complexity.
- Enhanced Governance - Robust governance policies and practices in place, ensuring compliance with organizational standards and industry regulations.
- Optimized Resource Management - Effective utilization of Power Platform resources, minimizing waste and maximizing value from the platform.

### Scope

This scope outlines the steps and considerations for adopting the Power Platform within an organization, focusing on tenant

and portfolio management.

### Methodology
