

Dynamics 365 Supply Chain Management: Landed Cost

Duration: 1 Day (Remote)

Focus Area: Business/IT Alignment

Difficulty level: 200

Intended Audience

This course is geared toward individuals who are responsible for or have an interest in inbound shipping operations related to operational handling and costing aspect processes.

Primary Audience: Inbound shipping and costing professionals

Secondary Audience: Accounts payable and Supply chain professionals

Overview

The Landed cost module helps businesses streamline inbound shipping operations by giving users complete financial and logistical control over imported freight from the manufacturer to the warehouse.

The Microsoft Dynamics 365 Landed Cost Chalk Talk is a one-day engagement delivered remotely by a Dynamics 365 Supply Chain Management expert.

Objectives and Key takeaways

Individuals who attend this course will retain a working knowledge of how to:

- Estimate landed costs at the time of voyage creation.
- Apportion landed costs to multiple items and purchase orders or transfer orders in a single voyage.
- Support the transfer of goods between physical locations by recognizing landed costs.
- End to End process of Goods in Transit (GIT)
- Recognize accruals for goods in transit.

Agenda

- **Module 1: Setup – Landed Cost**
