

Project Quality Advisory (Basic) – for Dynamics 365 Finance and SCM

Designated Engineering overview Business focus

Reduce risks and accelerate your complex Dynamics 365 deployment

Accelerate deployment and achieve a successful Dynamics 365 Finance and Dynamics 365 Supply Chain Management implementation. Engage with Microsoft technical experts who impart knowledge, skills, and expertise to reduce risk and accelerate deployment of complex Dynamics 365 solutions.

Finance and Supply Chain Management—De-risk and accelerate your deployment with the help of prescriptive guidance and recommended practices from a Microsoft technical expert.

Drive outcomes

Your priorities

- Maximize Microsoft Dynamics 365 investment and improve business results through a successful and efficient implementation.
- Identify and plan for mitigation of implementation risks.
- Create comprehensive readiness strategy and plan.

Outcomes we deliver

- Customer-driven assessments, technical guidance, and reviews using the Success by Design for Dynamics 365 framework.
- Pro-active issue identification and recommendations through code reviews or performance reviews prior to go-live.
- Routine touchpoints covering both functional and technical alignment throughout engagement.

What your Designated Engineering package could look like

Your account team will design a specific program of services tailored to your organization's business and technology goals. If you're still defining your technology needs, our experts will work with you to assess your strategy and tailor an engagement for your organization. Here's what a sample **Project Quality Advisory (Basic) – for Dynamics 365 Finance and SCM** could look like:
