Onboarding Accelerator – Dynamics 365 Finance ALM

Onboarding Services

Duration: 2 days
Difficulty Level: 300 - Advanced

Overview
Finance apps are enterprise resource planning (ERP) software as a service (SaaS) offerings that are built on and for Microsoft Azure. The finance and operations service provides organizations with ERP functionality that supports their unique requirements and helps them adjust to constantly changing business environments, without requiring that they manage infrastructure.

Objectives
- Receive guidance on the tools available and how they fit different ALM scenarios.
- Gain hands-on experience with ALM practices

Outcomes
Gain knowledge in extending Dynamics Finance thru ALM Best Practices to include testing and automation

Methodology
Learn by example
Work closely with a Microsoft engineer to learn key concepts and best practices to enable a real-world deployment scenario.
Hands-on
Work with a Microsoft engineer to set up Dynamics 365 Finance features

Scope
The scope is limited to working within one Dynamics 365 Finance app

Microsoft

Delivery Outline

Requirements	
Participants • Dynamics 365 for Finance and Operations architects, developers, and administrators who are responsible for designing, developing, and monitoring integrations. **Skill Requirements** • Experience with Dynamics 365 for Finance and Operations	**Delivery Requirements** • Computer with Windows 10 or later, audio equipment, internet access and at least 1 Mbps bandwidth per participant • Microsoft/Windows Live ID to connect to the virtual environment • Microsoft Teams for remote deliveries • A modern browser capable of rendering web sites that use current web standards

Available Modules		
Onboarding Accelerator - Dynamics 365 Finance and Operations: Build and Deployment Automation	• 2 Days • Level 300	The build and deployment activities necessary to maintain and operate Microsoft Dynamics 365 Finance and Operations apps can be time consuming when done manually. This offering will provide you with the deployment assistance necessary to successfully configure and implement a build and deployment automation solution for your Finance and Operations apps. This will help minimize the time and effort required to build and deploy code changes to your test environments.
Onboarding Accelerator - Dynamics 365 Finance and Operations: Test Automation	• 2 Days • Level 300	Manual testing of business processes is a time-consuming task, especially when you consider how frequently the Microsoft Dynamics 365 Finance and Operations apps are updated. Test automation helps minimize the time and effort required to test your key business processes so you can quickly verify application functionality each time new customizations are implemented, a new feature is activated, or a Microsoft update is applied. This offering will provide you with the deployment assistance necessary to successfully configure and implement a test automation solution for Finance and Operations. This will enable your organization to be more agile and react more quickly to changing business needs.

Note: Advanced lessons can be replaced with any other lessons.
